Type XXI U-Boat (Anatomy of the Ship) By Fritz Kohl, Eberhard Rossler

The design of the Type XXI U-boat was a radical step in the history of submarine development; indeed, the vessel could be said to have been the prototype of the modern conventionally powered submarine. After the disastrous losses among conventional submarines during the early months of 1943, the German authorities concluded that the older boats, Types VII, IXC and IXD, were no match for Allied ASW techniques. The Type XXI design was the response to the deteriorating situation and the first boats were launched in the spring of 1944 only nine months after the initial presentation of the designs. These remarkable vessels incorporated a number of bold innovations including the schnorkel, which allowed it to run fast underwater employing its diesel machinery, and automatic torpedo reloading systems; and never before had such large and complex warships been built using standardised, prefabricated sections. The type was a new and menacing weapon which might have had a profound effect on the conduct of the war had it been introduced earlier. The 'Anatomy of the Ship' series aims to provide the finest documentation of individual ships and ship types ever published. What makes the series unique is a complete set of superbly executed line drawings, both the conventional type of plan as well as explanatory views, with fully descriptive keys. These are supported by technical details and a record of the ship's service history.

Editorial Review

About the Author

Fritz Kohl served in the U-boats during the Second World War and then trained as a technical draughtsman. His reconstructions of builder's drawings led to collaboration with Eberhard Rossler, probably the world's leading authority on the history of German submarine development.

Users Review

From reader reviews:

Stephanie Cromwell:

Your reading sixth sense will not betray a person, why because this Type XXI U-Boat (Anatomy of the Ship) e-book written by well-known writer who knows well how to make book which might be understand by anyone who all read the book. Written with good manner for you, leaking every ideas and creating skill only for eliminate your personal hunger then you still uncertainty Type XXI U-Boat (Anatomy of the Ship) as good book not just by the cover but also with the content. This is one guide that can break don't evaluate book by its protect, so do you still needing one more sixth sense to pick this kind of!? Oh come on your reading sixth sense already alerted you so why you have to listening to one more sixth sense.

Brad Hawkes:

This Type XXI U-Boat (Anatomy of the Ship) is great reserve for you because the content that is full of information for you who also always deal with world and also have to make decision every minute. That book reveal it facts accurately using great arrange word or we can declare no rambling sentences inside. So if you are read this hurriedly you can have whole details in it. Doesn't mean it only provides straight forward sentences but tough core information with beautiful delivering sentences. Having Type XXI U-Boat (Anatomy of the Ship) in your hand like finding the world in your arm, information in it is not ridiculous one. We can say that no e-book that offer you world throughout ten or fifteen tiny right but this publication already do that. So , it is good reading book. Hello Mr. and Mrs. hectic do you still doubt that?

Denise Dennis:

You can obtain this Type XXI U-Boat (Anatomy of the Ship) by check out the bookstore or Mall. Simply viewing or reviewing it might to be your solve problem if you get difficulties for the knowledge. Kinds of this reserve are various. Not only by means of written or printed but also can you enjoy this book through e-book. In the modern era including now, you just looking because of your mobile phone and searching what your problem. Right now, choose your own ways to get more information about your book. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose proper ways for you.

Henry Brown:

As a university student exactly feel bored in order to reading. If their teacher expected them to go to the library or make summary for some reserve, they are complained. Just very little students that has reading's heart and soul or real their leisure activity. They just do what the instructor want, like asked to the library. They go to there but nothing reading critically. Any students feel that reading through is not important, boring in addition to can't see colorful photos on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this Type XXI U-Boat (Anatomy of the Ship) can make you truly feel more interested to read.
