Editorial Review

Review

"The authors have succeeded in creating a very readable, well set out and comprehensive work that makes sense of the bewildering number of clinical examination tests used in everyday practice. This book is a great resource for all clinicians involved in diagnosing and treating musculoskeletal conditions."

Peter Schranz FRCS Orth Consultant Orthopaedic Surgeon

"These two highly respected clinicians have created a really clear and concise book that houses the many extra tests used in this area of medicine and importantly, have analyzed the relevance of each one in the context of modern day, evidence based practice."

Dr Bryan English, MB, ChB, DO, Dip Sports Med, FFSEM Chief Medical Officer, Chelsea Football Club

"This book is an excellent resource for all clinicians wishing to advance their examination and interpretative skills, particularly for those training or working in a specialist musculoskeletal role."

Suzie Durrell, MSc MMAPC MCSP Consultant Physiotherapist

"I know that there are some incredibly clever physiotherapists who not only know all the MSK tests, but also how to perform them accurately and even remember their names. Those people need read no further but the rest of us mere mortals will find this little gem of a book really useful...Having read it from cover to cover it will now sit on my desk so that I can dip into it whenever I need to and I will think 'well done Paul Hattam and Alison Smeatham.'
