Institute of Petroleum Standards for Petroleum and Its Products: Methods for Analysis and Testing Pt. 1 (Petroleum measurement manual) By The Institute of Petroleum (London)

Standardised methods for the testing and analysis of petroleum are necessary to ensure reproducibility of results between buyers and sellers at all levels. Such methods do not stand still. As particular technical advances are made - faster, more accurate procedures present themselves and have to be assessed for their utility. The methods for analysis and testing contained in "IP Standards" are reviewed constantly and a revised edition incorporating new, proposed and modified standard methods is published annually. The volumes cover the field of petroleum and its products and are therefore an essential reference manual for chemists and engineers working in the industry and its associated fields. It has been designed to benefit all those involved in the oil and petroleum industry, petroleum and oil scientists and engineers, and industrial chemists.
