A First Course in Multivariate Statistics (Springer Texts in Statistics) By Bernard Flury

A comprehensive and self-contained introduction to the field, carefully balancing mathematical theory and practical applications. It starts at an elementary level, developing concepts of multivariate distributions from first principles. After a chapter on the multivariate normal distribution reviewing the classical parametric theory, methods of estimation are explored using the plug-in principles as well as maximum likelihood. Two chapters on discrimination and classification, including logistic regression, form the core of the book, followed by methods of testing hypotheses developed from heuristic principles, likelihood ratio tests and permutation tests. Finally, the powerful self-consistency principle is used to introduce principal components as a method of approximation, rounded off by a chapter on finite mixture analysis.

Editorial Review

Review

From a review:

JOURNAL OF THE AMERICAN STATISTICAL ASSOCIATION

"... is actually a very unique book that differs considerably from other multivariate texts. Flury should be applauded for his intention and effort to produce a new type of multivariate book that is neither a comprehensive theoretical treatise nor an encyclopedic methods cookbook. ... it is a welcome addition to the multivariate statistics literature. This is a well-written book with vivid and lively discussions."

Users Review

From reader reviews:

George Finch:

Here thing why that A First Course in Multivariate Statistics (Springer Texts in Statistics) are different and dependable to be yours. First of all examining a book is good however it depends in the content from it which is the content is as tasty as food or not. A First Course in Multivariate Statistics (Springer Texts in Statistics) giving you information deeper since different ways, you can find any publication out there but there is no book that similar with A First Course in Multivariate Statistics (Springer Texts in Statistics). It gives you thrill examining journey, its open up your own personal eyes about the thing this happened in the world which is probably can be happened around you. You can actually bring everywhere like in recreation area, café, or even in your approach home by train. When you are having difficulties in bringing the printed book maybe the form of A First Course in Multivariate Statistics (Springer Texts in Statistics) in e-book can be your alternate.

David Scott:

Reading a guide can be one of a lot of action that everyone in the world enjoys. Do you like reading book so. There are a lot of reasons why people fantastic. First reading a reserve will give you a lot of new details. When you read a reserve you will get new information due to the fact book is one of many ways to share the information or their idea. Second, examining a book will make you more imaginative. When you reading through a book especially fictional works book the author will bring that you imagine the story how the figures do it anything. Third, you are able to share your knowledge to some others. When you read this A First Course in Multivariate Statistics (Springer Texts in Statistics), you may tells your family, friends and soon about yours e-book. Your knowledge can inspire the others, make them reading a guide.

Jeff Brown:

Typically the book A First Course in Multivariate Statistics (Springer Texts in Statistics) has a lot info on it. So when you make sure to read this book you can get a lot of advantage. The book was written by the very famous author. Mcdougal makes some research just before write this book. This book very easy to read you will get the point easily after looking over this book.

Stephanie Landa:

Are you kind of active person, only have 10 as well as 15 minute in your day to upgrading your mind talent or thinking skill even analytical thinking? Then you are experiencing problem with the book as compared to can satisfy your short period of time to read it because this time you only find reserve that need more time to be read. A First Course in Multivariate Statistics (Springer Texts in Statistics) can be your answer as it can be read by a person who have those short spare time problems.
