How to Live on Mars: A Trusty Guidebook to Surviving and Thriving on the Red Planet By Robert Zubrin

Thinking about moving to mars?

Well, why not? Mars, after all, is the planet that holds the greatest promise for human colonization. But why speculate about the possibilities when you can get the real scientific scoop from someone who's been happily living and working there for years? Straight from the not-so-distant future, this intrepid pioneer's tips for physical, financial, and social survival on the Red Planet cover:

- How to get to Mars (Cycling spacecraft offer cheap rides, but the smell is not for everyone.)
- Choosing a spacesuit (The old-fashioned but reliable pneumatic Neil Armstrong style versus the sleek new—but anatomically unforgiving—elastic “skinsuit.”)
- Selecting a habitat (Just like on Earth: location, location, location.)
- Finding a job that pays well and doesn't kill you (This is not a metaphor on Mars.)
- How to meet the opposite sex (Master more than forty Mars-centric pickup lines.)

With more than twenty original illustrations by Michael Carroll, Robert Murray, and other renowned space artists, *How to Live on Mars* seamlessly blends humor and real science, and is a practical and exhilarating guide to life on our first extraterrestrial home.

Editorial Review

From School Library Journal

Adult/High School—This guidebook for would-be Mars settlers is equal parts "Mars-humor" and science fiction (the narrator was born on Mars in 2071); a satire highly critical of NASA; and a Loompanics-flavored manifesto of rugged individualism. Fans of vintage Robert A. Heinlein, particularly *The Rolling Stones* (Del Rey, 1977), will feel right at home here as they enjoy descriptions of practical situations that might actually be encountered: air circulation technologies; choice of "habs"; pitfalls and scams that greenhorns should avoid. Enlivened by witty illustrations, the prose is both humorous and fact filled, with more technical and scientific information set aside in sections marked "Warning: High Science Content." Zubrin's presentation is clear and interesting but some might object that he puts no curbs on content like chemical recipes for explosives, and his Mars-based narrator's views are simplistic on complex Earth-based issues like global warming, bioengineering, and the value of government as a social contract. These topics could spark interesting classroom discussions. Valuable for teachers, this book is enjoyable and attractive for teens and will fascinate, provoke, and delight anyone interested in Mars and space settlement.—*Christine C. Menefee, formerly at Fairfax County Public Library, VA*

In *The Case For Mars* (1997), Zubrin outlined a plan for visiting the red planet on a budget, offering plausible scientific scenarios for its colonization and eventual terraforming. Here he makes his case more whimsically by presenting in the form of a guidebook for the twenty-second-century pioneer on the way to already well-established, prefab Martian settlements. In practical, bite-sized chapters, he doles out advice on choosing a spacesuit (the elastic kind accentuates your buff physique, if you have one), describes Martian jobs that pay well (and don't kill you), and even provides tips on delivering effective pickup lines (hint: what works in Earth's saloons won't work at film festivals in New Plymouth, Mars). Skillfully rendered illustrations of Martian colony life spice up instructions on how to invest your savings, avoid bureaucratic persecution, and achieve fame by making groundbreaking discoveries. Despite its deliberately droll tone, Zubrin's primer grounds each chapter in legitimate science (with some leeway for delightfully extravagant speculation) and makes this futuristic peek at the Martian frontier an enjoyable learning experience. --Carl Hays

Valuable for teachers, this book is enjoyable and attractive for teens and will fascinate, provoke, and delight anyone interested in Mars and space settlement."

—*School Library Journal*, Christine C. Menefee, formerly at Fairfax County Public Library, VA

“Informative, irreverent, and just plain fun to read. On to Mars!”

—Ben Bova, author of *Mars Life*

“You’ll marvel at possibilities, laugh out loud at clever inventions, and relish the tongue-lashing of our present times Zubrin delivers with high-velocity, clear prose.”

—Gregory Benford, author of *The Martian Race*

“I learned more about the science of Mars and the nature of freedom on the new space frontier than from a dozen straight-faced textbooks. And it’s funny. This is Heinlein on helium.”

—Stephen Baxter, international bestselling author of *Voyage*

Users Review

From reader reviews:

Carmen Flood:

Do you have favorite book? In case you have, what is your favorite's book? Reserve is very important thing for us to know everything in the world. Each reserve has different aim as well as goal; it means that reserve has different type. Some people sense enjoy to spend their the perfect time to read a book. They are reading whatever they have because their hobby is definitely reading a book. Why not the person who don't like examining a book? Sometime, particular person feel need book when they found difficult problem or exercise. Well, probably you will need this How to Live on Mars: A Trusty Guidebook to Surviving and Thriving on the Red Planet.

Jennifer Nava:

In this period globalization it is important to someone to obtain information. The information will make someone to understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of referrals to get information example: internet, newspaper, book, and soon. You will see that now, a lot of publisher that will print many kinds of book. The actual book that recommended for you is How to Live on Mars: A Trusty Guidebook to Surviving and Thriving on the Red Planet this reserve consist a lot of the information from the condition of this world now. This specific book was represented how do the world has grown up. The terminology styles that writer require to explain it is easy to understand. The writer made some analysis when he makes this book. Here is why this book ideal all of you.

Martha Howell:

As we know that book is very important thing to add our information for everything. By a reserve we can know everything we would like. A book is a range of written, printed, illustrated as well as blank sheet. Every year was exactly added. This e-book How to Live on Mars: A Trusty Guidebook to Surviving and Thriving on the Red Planet was filled with regards to science. Spend your extra time to add your knowledge about your scientific disciplines competence. Some people has various feel when they reading a book. If you know how big selling point of a book, you can experience enjoy to read a book. In the modern era like currently, many ways to get book that you wanted.

Jessie Davis:

That e-book can make you to feel relax. That book How to Live on Mars: A Trusty Guidebook to Surviving and Thriving on the Red Planet was multi-colored and of course has pictures on there. As we know that book How to Live on Mars: A Trusty Guidebook to Surviving and Thriving on the Red Planet has many kinds or type. Start from kids until teenagers. For example Naruto or Investigation company Conan you can read and believe that you are the character on there. Therefore , not at all of book tend to be make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book in your case and try to like reading this.
