### **Editorial Review**

From Publishers Weekly

Since this trio's 1982 publication of the college textbook *Human Sexuality*, sex-abuse cases and teenage pregnancies have multiplied, the "G-spot" has been identified, the AIDS epidemic has traumatized gays and straights alike, and the contraceptive sponge (with its 15% failure rate) has been introduced. This volume, which reproduces most of the 1982 text, covers these and other developments in chapters dealing with sexual anatomy and response, birth control, gender roles, homosexuality, sexual fantasy and so forth. The tone is responsible, clinical and dry, but the basic information provided should prove helpful to many. The authors offer straightforward suggestions to parents on sex education along with advice to persons who have been involved in incest and to couples who want to enhance sexual satisfaction. While touting the Masters and Johnson sex-therapy method as revolutionary, they discuss various rival approaches and offer guidelines for choosing a sex therapist. First serial to Redbook. From Library Journal

In the decade since they proved worthy of a discerning general audience with *The Pleasure Bond* (1975), pioneer sex therapists Masters and Virginia Johnson have written chiefly for professional and college readers. This comprehensive book makes accessible to lay readers scientific data and humane perspectives on topics ranging from anatomy and physiology to homosexuality, sex therapy, love, birth control, and gender roles. Outstanding are chapters on fantasy (with permission to keep it private), communication, coercive sex, and sexual satisfaction. Also included is up-to-date material on AIDS. Good science, psychological sensitivity, common sense, and fine writing make this an essential source for most libraries. E. James Lieberman, Psychiatry Dept., George Washington Univ., Washington, D.C.
