From the Back Cover

From the earliest times swearing has existed in many variegated forms, from the deadliest curse to the most trivial expletives of annoyance. Hedged about with all manner of complex pressures, personal, societal, religious, sexual and other forms of taboo, it remains a phenomenon only imperfectly understood. Geoffrey Hughes traces these two contrasting strands through our linguistic history. His discussion starts with the use of language as magic in 'primitive' society, the binding oath of heroic commitment in Anglo-Saxon warrior society and the emergence of blasphemy in the medieval age of faith. With the Renaissance came a shift from a religious to a secular idiom of swearing, a period combining rich exuberance in language with severe restraint. This oscillation between institutional censorship and individual defiance continues to modern times. Professor Hughes includes in this broad-ranging survey such topics as xenophobia and the racist basis of abuse, graffiti, the sexual and sexist patterns of swearing, the multifarious forms of euphemism and the curious varieties of verbal duelling known as 'flyting' and 'sounding'. His book is a tireless exploration of a little discussed but irrepressible part of our linguistic heritage.
