Building Financial Models (McGraw-Hill Finance & Investing) By John Tjia

The ability to effectively create and interpret financial models is one of the most valued skills in corporate finance--from Wall Street to Main Street. Now, the acclaimed guide to designing, building, and implementing valuation projection models is fully revised and expanded to keep finance and accounting professionals competitive in today's marketplace.

This second edition of *Building Financial Models* continues the tradition of its predecessor by providing a hands-on approach to creating a core model that is supported by broad coverage of cornerstone accounting and finance principles. Additionally, this updated volume features:

- Entirely new coverage of discounted cash flow (DCF) modeling
- Excel formulas for making powerful calculations within the spreadsheet
- In-depth explanations of both the principles and mechanics of projection models

Building Financial Models helps readers practice good thinking and apply sound knowledge of their tools--two key attributes to producing robust and easy-to-use models. This practical guide takes you step by step through the entire process of developing a projection model, with a full chapter dedicated to each phase. By the end, you will have a working, dynamic spreadsheet financial model for making projections for industrial and manufacturing companies.

Furthermore, this Second Edition provides the vocabulary and syntax of model building so you can tailor core models to fit any size company and allow for quick input changes to test sensitivity. The companion website www.buildingfinancialmodel.com offering example spreadsheets will give you a head start on developing your own models.

A flexible and successful financial projection model does more than just add numbers--it explains the complex relationships between those numbers and illuminates ways to use those associations to add value to an enterprise. *Building Financial Models* is the only book you need to create and implement a fluid financial projection model that is both state of the art and user friendly.

Editorial Review

From the Back Cover

The most up-to-date guide available for designing, building, and implementing valuation projection models

This updated and augmented second edition of *Building Financial Models* provides a state-of-the-art method for creating projection models that will accurately determine a company's valuation today and its earnings and profits tomorrow.

Complete with brand new material on discounted cash flow (DCF) modeling and an accompanying website with example spreadsheets, *Building Financial Models* is the most comprehensive guide to real-world projection modeling available.

Globally recognized by accounting and finance professionals for its proven step-by-step approach, this hands-on road map to projection model design and implementation features:

- An overview of projection models--what they are, how they are used, and how they vary between industries
- In-depth explanations of the accounting and finance concepts that underpin working financial models
- Detailed directions for using spreadsheet software to create dynamically powerful financial models
- Clear strategies for producing and using a projection model that allows the user to change inputs quickly for sensitivity testing

Building Financial Models is a single, go-to resource that offers unparalleled depth of coverage and breadth of topic.

Get started on *Building Financial Models* now to develop the skills you need to stay competitive in today's corporate finance arena.
