Essentials of the Human Brain E-Book: With STUDENT CONSULT Online Access By John Nolte

Master neurology with the help of Jack Nolte, PhD, recognized for his skill in communicating complicated neuroscience concepts. This book's clear narrative style and review questions allow you to test and verify your knowledge. The short length, full-color illustrations, and brain images make learning quick and easy. Multiple-choice and comprehensive review questions, as well as blank diagrams you can use for labeling practice, help you study and reinforce what you have learned. This easy-to-read text, coupled with Student Consult online access, gives you an excellent overview of neuroscience and neuroanatomy for effective understanding of key information in studying and reviewing for exams.

- Provides the appropriate level of information to take the anxiety out of a complex subject.
- Offers an added level of understanding through explanatory color illustrations and brain images that visually depict structure-function relationships and key neuroscience concepts.
- Includes multiple-choice and comprehensive review questions with explanations that cover the core topics in the book so you can test and develop your knowledge.
- Features review tools, via Student Access.

Editorial Review

Review

"This is a useful tool for any student studying neuroscience and neuroanatomy. The author does an excellent job of maintaining a narrative approach to the material, as well as breaking down the complex material in a manner that is conducive to student learning. The book provides a unique focus on the human brain and is an important addition to the neuroscience literature.

The book divides complex material up into multiple chapters to ease student anxiety. The appendixes are very useful and provide a comprehensive quiz, answers to the chapter questions, and blank drawings to aid in student learning.

Designed for upper level anatomy and physiology students as well as premedical students, this book goes into detail that is not seen in 100 and 200 level undergraduate courses. The author is considered an expert in the area of neuroscience. Weighted Numerical Score: 94 - 4 Stars!" -- *Jill E. Feinstein, M.S.(Richland Community College), from Doody's Reviews*

Users Review

From reader reviews:

Clara Lee:

What do you with regards to book? It is not important to you? Or just adding material when you need something to explain what yours problem? How about your extra time? Or are you busy man?
