### **Global Governance: Drawing Insights from the Environmental Experience (Global Environmental Accord: Strategies for Sustainability and Institutional Innovation) From The MIT Press**

Much of our experience with innovative approaches to governance at the international level involves natural resources and the environment. Whereas the Cold War bred an intense concern with the preservation of existing institutions, the emerging environmental agenda has prompted an awareness of the need for new arrangements to achieve sustainable human/environment relations. Especially notable is the growth of specific regimes to deal with matters such as endangered plants and animals, migratory species, airborne pollutants, marine pollution, hazardous wastes, ozone depletion, and climate change. Nonstate actors have made particularly striking advances in the creation and maintenance of these environmental regimes. The contributors to this volume draw upon the experiences of environmental regimes to examine the problems of international governance in the absence of a world government. In the process, they address four central questions: Has regime analysis produced a distinctive conception of governance that can be applied to the solution of collective-action problems at the international level? Can we identify the conditions necessary for international "governance without government" to succeed? Does the emergence of regimes in specific issue areas have broader consequences for the future of international society? Can we generalize from experience with environmental issues to a broader range of international governance problems? Contributors : Thomas Bernauer, Lee Botts, Helmut Breitmeier, Paul Muldoon, M. J. Peterson, David Reed, Olav Schram Stokke, Marcia Valiante, Konrad von Moltke, Paul Wapner, Oran R. Young.

## **Editorial Review**

### Review

" *Global Governance* is must reading for anyone concerned with the workings of the mysterious spiderweb of institutions by which the international system tries to manage the rampaging forces of global environmental change. Oran Young has gathered a collection of eight carefully researched and cogently presented case studies that are the latest word on the subject." **Abram Chayes** , Felix Frankfurter Professor of Law Emeritus, Harvard Law School

"This book makes a strong case that global governance matters. The main contribution of the book is to correct the state-centrism of existing literature on international regimes and to suggest not only that global civil society matters for global governance as well, but to begin theorizing about how effective governance in fact emerges from the interrelations of international regimes and civil society." **Barbara Connolly** , Professor of Political Science, Tufts University

### About the Author

Oran R. Young is Professor and Codirector of the Program on Governance for Sustainable Development at the Bren School of Environmental Science and Management, University of California, Santa Barbara, and Chair of the Scientific Committee of the International Human Dimensions Programme on Global Environmental Change, sponsored by the International Council Of Science (ICSU), the International Social Science Council (ISSC), and the United Nations University (UNU). He is the author of *The Institutional Dimensions of Environmental Change: Fit, Interplay, and Scale* (2002) and coeditor (with Leslie A. King and Heike Schroeder) of *Institutions and Environmental Change: Principal Findings, Applications, and Research Frontiers* (2008), both published by the MIT Press.

## **Users Review**

### **From reader reviews:**

#### **Kevin Serna:**

What do you regarding book? It is not important together with you? Or just adding material when you need something to explain what you problem? How about your spare time? Or are you busy person? If you don't have spare time to perform others business, it is make one feel bored faster. And you have free time? What did you do? Everyone has many questions above. They have to answer that question simply because just their can do that. It said that about publication. Book is familiar in each person. Yes, it is right. Because start from on pre-school until university need this particular *Global Governance: Drawing Insights from the Environmental Experience (Global Environmental Accord: Strategies for Sustainability and Institutional Innovation)* to read.
