By Tony Pelz

## The Biotech Trader Handbook By Tony Pelz

Small cap biotech companies spend hundreds of millions of dollars and over ten years moving experimental drug candidates from concept to fully approved drugs. For late stage drug candidates, those in Phase III, positive or negative data can result in either massive gains or devastating declines in the sponsoring company's stock price. This "ultimate catalyst event" provides smart, organized & nimble option traders spectacular & consistent trading opportunities. In this unique book, the author provides individuals unfamiliar with the world of small cap biotech a fast, simplified and efficient approach to identify, analyze & execute trading strategies using options. The following topics, amongst others, are covered in this book: \* Description of the FDA drug trial process, from pre-clinical to Phase III & beyond \* Identification, categorization & organization of small cap biotech companies \* Structured & streamlined approach to assess small cap biotech companies \* Notes on trading strategy & tactics \* Detailed description of option trading structures best suited for small cap biotech This book is an absolute "must have" for individuals thinking about trading in the fast paced and often confusing world of small cap biotech.
