A First Course in Integral Equations

By A M Wazwaz

A First Course in Integral Equations By A M Wazwaz

This book presents the subject of integral equations in an accessible manner for a variety of applications. Emphasis is placed on understanding the subject while avoiding the abstract and compact theorems. A distinctive feature of the book is that it introduces the recent powerful and reliable developments in this field, which are not covered in traditional texts. The newly developed decomposition method, the series solution method and the direct computation method are thoroughly implemented, which allows the topic to be far more accessible. The book also includes some of the traditional techniques for comparison.

Using the newly developed methods, the author successfully handles Fredholm and Volterra integral equations, singular integral equations, integro-differential equations and nonlinear integral equations, with promising results for linear and nonlinear models. Many examples are given to introduce the material in a clear and thorough fashion. In addition, many exercises are provided to build confidence, ease and skill in using the new methods.

This book may be used as a text for advanced undergraduates and graduate students in mathematics and scientific areas, and as a work of reference for research study of differential equations and numerical analysis.

Editorial Review

Users Review

From reader reviews:

Mandy Conway:

Nowadays reading books are more than want or need but also be a life style. This reading addiction give you lot of advantages. The huge benefits you got of course the knowledge even the information inside the book that improve your knowledge and information. The information you get based on what kind of book you read, if you want send more knowledge just go with knowledge books but if you want sense happy read one having theme for entertaining like comic or novel. Often the A First Course in Integral Equations is kind of book which is giving the reader capricious experience.

Robert Qualls:

Information is provisions for those to get better life, information today can get by anyone on everywhere. The information can be a information or any news even an issue. What people must be consider any time those information which is inside former life are challenging be find than now could be taking seriously which one would work to believe or which one the actual resource are convinced. If you receive the unstable resource then you understand it as your main information you will have huge disadvantage for you. All those possibilities will not happen within you if you take A First Course in Integral Equations as your daily resource information.

Dean Rakestraw:

This A First Course in Integral Equations is great reserve for you because the content that is full of information for you who all always deal with world and also have to make decision every minute. This particular book reveal it details accurately using great organize word or we can say no rambling sentences inside it. So if you are read the idea hurriedly you can have whole facts in it. Doesn't mean it only gives you straight forward sentences but tricky core information with lovely delivering sentences. Having A First Course in Integral Equations in your hand like having the world in your arm, data in it is not ridiculous a single. We can say that no reserve that offer you world throughout ten or fifteen small right but this reserve already do that. So , it is good reading book. Hi Mr. and Mrs. busy do you still doubt in which?

Arthur Ramires:

Many people spending their period by playing outside with friends, fun activity together with family or just watching TV all day every day. You can have new activity to invest your whole day by studying a book. Ugh, you think reading a book can definitely hard because you have to take the book everywhere? It alright you can have the e-book, taking everywhere you want in your Cell phone. Like A First Course in Integral

Equations which is keeping the e-book version. So , try out this book? Let's observe.
