Sims' Symptoms in the Mind: An Introduction to Descriptive Psychopathology By Femi Oyeboade

SIMS' SYMPTOMS IN THE MIND has, since its first publication in 1988, become established as the leading introductory textbook on clinical psychopathology. This new edition has been fully updated to include advances in neuropsychology and cognitive neuroscience and changes can be found in the chapters on memory disturbance, disorders of time, pathology of perception, disorders of speech and language, affect and emotional disorders, and disorders of volition and execution. In some cases, novel classifications of the abnormalities under consideration have been provided together with additional pathological phenomena - including palinopsia, akinetopsia, zeitraffer phenomenon, exosomesthesia - many of which have been rediscovered or imported from neurology. The popular and distinctive features are the use of figures, tables and illustrative case examples which have been further enhanced with additional case examples from the classical literature, autobiographical narratives and fiction.

- New section headings provide firmer thematic unity to the content
- Check boxes summarize important points such as classification of particular areas
- Additional examples of psychopathology are included which are drawn from a wide source including fiction, autobiography and clinical textbooks
- Includes an extended range of abnormalities, including those which have previously been neglected, such as alloesthesia, palinaptia, teleopsia, pelopsia, akinetopsia, palinopsia, and parapsopia
- Fully updated description of the theoretical aspects of memory and its disturbance
- Fully integrated neuropsychological concepts of imagery and internal mental representations in the chapter on abnormalities of perception

Ralph Smith:

As a pupil exactly feel bored to help reading. If their teacher requested them to go to the library or make summary for some book, they are complained. Just little students that has reading's soul or real their hobby. They just do what the teacher want, like asked to go to the library. They go to at this time there but nothing reading significantly. Any students feel that reading is not important, boring as well as can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore this Sims' Symptoms in the Mind: An Introduction to Descriptive Psychopathology can make you experience more interested to read.
