

Design of Joints in Steel and Composite Structures: Eurocode 3: Design of Steel Structures. Part 1-8 Design of Joints. Eurocode 4: Design of Composite ... of Joints (Eccs Eurocode Design Manuals)

From Ernst & Sohn

Design of Joints in Steel and Composite Structures: Eurocode 3: Design of Steel Structures. Part 1-8 Design of Joints. Eurocode 4: Design of Composite ... of Joints (Eccs Eurocode Design Manuals) From Ernst & Sohn

This book details the basic concepts and the design rules included in Eurocode 3

- Design of steel structures: Part 1-8
- Design of joints
- Joints in composite construction are also addressed through references to Eurocode 4
- Design of composite steel and concrete structures
- Part 1-1: General rules and rules for buildings.

Attention has to be duly paid to the joints when designing a steel or composite structure, in terms of the global safety of the construction, and also in terms of the overall cost, including fabrication, transportation and erection. Therefore, in this book, the design of the joints themselves is widely detailed, and aspects of selection of joint configuration and integration of the joints into the analysis and the design process of the whole construction are also fully covered.

Connections using mechanical fasteners, welded connections, simple joints, moment-resisting joints and lattice girder joints are considered. Various joint configurations are treated, including beam-to-column, beam-to-beam, column bases, and beam and column splice configurations, under different loading situations (axial forces, shear forces, bending moments and their combinations).

The book also briefly summarises the available knowledge relating to the application of the Eurocode rules to joints under fire, fatigue, earthquake, etc., and also to joints in a structure subjected to exceptional loadings, where the risk of progressive collapse has to be mitigated.

Finally, there are some worked examples, plus references to already published examples and to design tools, which will provide practical help to practitioners.

Editorial Review

About the Author

Jean-Pierre Jaspart is professor of steel and composite constructions at Liège University, in Belgium. He is also involved in other teaching activities throughout Europe, and in particular in an Erasmus Mundus project, SUSCOS, together with five other top-level European universities in the field of steel construction. He carries out research in the following topics: stability and resistance of steel and composite structures, connection design in steel and composite constructions, and robustness of structural systems. In 1992, he won the Magnel Award. He is a member of the Technical Committee 'Connections' (TC10) of the ECCS and was chairman for several years of its sub-committee TWG10.2 'Joints'. Together with the second author and the late Martin Steenhuis, he drafted large parts of the initial version of Eurocode 3 Part 1-8 (the so-called Annex JJ) and is currently a member of Working Group CEN/TC 250/SC 3/WG 8 for the evolution of Eurocode 3 Part 1-8. He has authored over 260 publications, including 50 papers in international journals and 20 contributions to books.

Klaus Weynand worked for ten years at the Institute of Steel Construction at the Technical University of Aachen, Germany, as a researcher and teacher. He has been involved in many international research projects, his research mainly focusing on joints in steel structures. In 1999, he founded, together with Markus Feldmann in Aachen, his own design office Feldmann+Weynand, where he is still a partner and the managing director. Since 1992, Klaus Weynand has been a member of the Technical Committee ECCS TC 10 and, since 1997, a technical expert in the Technical Commission of CIDECT. He was involved in drafting the pre-version of Eurocode 3 Part 1-8, together with Jean-Pierre Jaspart, co-author of this book, and the late Martin Steenhuis from Delft. He has prepared papers for various international conferences and journals and has published books for practitioners (e.g. design tables for standardised joints). He is currently also a member of the German Mirror Group for Eurocode 3 and a member of the Working Group CEN/TC 250/SC 3/WG 8 for the evolution of Eurocode 3 Part 1-8.

Users Review

From reader reviews:

Janie Ross:

Book is to be different per grade. Book for children until adult are different content. To be sure that book is very important usually. The book Design of Joints in Steel and Composite Structures: Eurocode 3: Design of Steel Structures. Part 1-8 Design of Joints. Eurocode 4: Design of Composite ... of Joints (Eccs Eurocode Design Manuals) was making you to know about other knowledge and of course you can take more information. It is extremely advantages for you. The publication Design of Joints in Steel and Composite Structures: Eurocode 3: Design of Steel Structures. Part 1-8 Design of Joints. Eurocode 4: Design of Composite ... of Joints (Eccs Eurocode Design Manuals) is not only giving you considerably more new information but also to get your friend when you experience bored. You can spend your current spend time to read your publication. Try to make relationship together with the book Design of Joints in Steel and Composite Structures: Eurocode 3: Design of Steel Structures. Part 1-8 Design of Joints. Eurocode 4: Design of Composite ... of Joints (Eccs Eurocode Design Manuals). You never feel lose out for everything in case you read some books.

Willard Griffin:

Reading a book tends to be new life style in this era globalization. With reading you can get a lot of information that could give you benefit in your life. Having book everyone in this world can easily share their idea. Ebooks can also inspire a lot of people. Lots of author can inspire their very own reader with their story or perhaps their experience. Not only the story that share in the ebooks. But also they write about the data about something that you need example of this. How to get the good score toefl, or how to teach children, there are many kinds of book that you can get now. The authors these days always try to improve their skill in writing, they also doing some investigation before they write to the book. One of them is this Design of Joints in Steel and Composite Structures: Eurocode 3: Design of Steel Structures. Part 1-8 Design of Joints. Eurocode 4: Design of Composite ... of Joints (Eccs Eurocode Design Manuals).

Ian Louviere:

A lot of people always spent their very own free time to vacation or perhaps go to the outside with them family members or their friend. Are you aware? Many a lot of people spent that they free time just watching TV, as well as playing video games all day long. If you would like try to find a new activity honestly, that is look different you can read a new book. It is really fun for you personally. If you enjoy the book you read you can spent the entire day to reading a reserve. The book Design of Joints in Steel and Composite Structures: Eurocode 3: Design of Steel Structures. Part 1-8 Design of Joints. Eurocode 4: Design of Composite ... of Joints (Eccs Eurocode Design Manuals) it is quite good to read. There are a lot of people that recommended this book. These folks were enjoying reading this book. If you did not have enough space bringing this book you can buy the e-book. You can m0ore quickly to read this book from a smart phone. The price is not very costly but this book provides high quality.

Edward Doucet:

In this age globalization it is important to someone to obtain information. The information will make professionals understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You will observe that now, a lot of publisher in which print many kinds of book. The book that recommended for your requirements is Design of Joints in Steel and Composite Structures: Eurocode 3: Design of Steel Structures. Part 1-8 Design of Joints. Eurocode 4: Design of Composite ... of Joints (Eccs Eurocode Design Manuals) this reserve consist a lot of the information in the condition of this world now. This kind of book was represented how does the world has grown up. The terminology styles that writer make usage of to explain it is easy to understand. The actual writer made some exploration when he makes this book. Here is why this book suited all of you.
