Derivatives Models on Models

By Espen Gaarder Haug

Derivatives Models on Models By Espen Gaarder Haug

Derivatives Models on Models takes a theoretical and practical look at some of the latest and most important ideas behind derivatives pricing models. In each chapter the author highlights the latest thinking and trends in the area. A wide range of topics are covered, including valuation methods on stocks paying discrete dividend, Asian options, American barrier options, Complex barrier options, reset options, and electricity derivatives.

The book also discusses the latest ideas surrounding finance like the robustness of dynamic delta hedging, option hedging, negative probabilities and space-time finance. The accompanying CD-ROM with additional Excel sheets includes the mathematical models covered in the book.

The book also includes interviews with some of the world's top names in the industry, and an insight into the history behind some of the greatest discoveries in quantitative finance. Interviewees include:

- Clive Granger, Nobel Prize winner in Economics 2003, on Cointegration
- Nassim Taleb on Black Swans
- Stephen Ross on Arbitrage Pricing Theory
- Emanuel Derman the Wall Street Quant
- Edward Thorp on Gambling and Trading
- Peter Carr the Wall Street Wizard of Option Symmetry and Volatility
- Aaron Brown on Gambling, Poker and Trading
- David Bates on Crash and Jumps
- Andrei Khrennikov on Negative Probabilities
- Elie Ayache on Option Trading and Modeling
- Peter Jaeckel on Monte Carlo Simulation
- Alan Lewis on Stochastic Volatility and Jumps
- Paul Wilmott on Paul Wilmott
- Knut Aase on Catastrophes and Financial Economics
- Eduardo Schwartz the Yoga Master of Quantitative Finance
- Bruno Dupire on Local and Stochastic Volatility Models

About the Author
Dr Espen Gaarder Haug has more than 15 years of experience in Derivatives research and trading, and has

worked for more than 20 years as a trader. Until recently he worked as a proprietary trader in J.P. Morgan New York, and as a derivatives trader for two multi-billion dollar hedge funds; Amaranth Investor and Paloma Partners, located in Greenwich Connecticut. Before that he worked for Tempus Financial Engineering, Chase Manhattan Bank (now J.P. Morgan Chase) and Den Norske Bank.

He is the author of *The Complete Guide of Option Pricing Formulas*, which has become a reference manual among Wall Street professionals. He has a PhD from the Norwegian University of Science and Technology where he specialized in Option Valuation and Trading and has published extensively in practitioner and academic journals. He is currently considering setting up his own investment company - possibly the first Anti-Hedge fund!

Users Review

From reader reviews:

Enrique McLean:

Do you have favorite book? If you have, what is your favorite's book? E-book is very important thing for us to find out everything in the world. Each guide has different aim or even goal; it means that reserve has different type. Some people truly feel enjoy to spend their time for you to read a book. They may be reading whatever they have because their hobby will be reading a book. Consider the person who don't like examining a book? Sometime, man or woman feel need book if they found difficult problem or perhaps exercise. Well, probably you should have this Derivatives Models on Models.

Elizabeth Pipkin:

What do you concerning book? It is not important along? Or just adding material when you need something to explain what the one you have problem? How about your spare time? Or are you busy individual? If you don't have spare time to do others business, it is make one feel bored faster. And you have extra time? What did you do? Everybody has many questions above. They should answer that question simply because just their can do which. It said that about book. Book is familiar on every person. Yes, it is suitable. Because start from on pre-school until university need this specific Derivatives Models on Models to read.

Harry Fulford:

A lot of people always spent all their free time to vacation or maybe go to the outside with them household or their friend. Do you know? Many a lot of people spent they will free time just watching TV, or playing video games all day long. If you would like try to find a new activity honestly, that is look different you can read any book. It is really fun for you personally. If you enjoy the book you read you can spent all day every day to reading a e-book. The book Derivatives Models on Models it is rather good to read. There are a lot of those who recommended this book. They were enjoying reading this book. In the event you did not have enough space bringing this book you can buy the e-book. You can m0ore easily to read this book out of your smart phone. The price is not to fund but this book provides high quality.

Alexander Pridmore:

Is it a person who having spare time and then spend it whole day by means of watching television programs or just lying down on the bed? Do you need something totally new? This Derivatives Models on Models can be the answer, oh how comes? It's a book you know. You are thus out of date, spending your spare time by reading in this completely new era is common not a nerd activity. So what these publications have than the others?
