Start Concurrent: An Introduction to Problem Solving in Java With a Focus on Concurrency, 2014 By Barry Wittman, Aditya Mathur, Tim Kob

Multicore microprocessors are now at the heart of nearly all desktop and laptop computers. While these chips offer exciting opportunities for the creation of newer and faster applications, they also challenge students and educators. How can the new generation of computer scientists growing up with multicore chips learn to program applications that exploit this latent processing power? This unique book is an attempt to introduce concurrent programming to first-year computer science students, much earlier than most competing products. This book assumes no programming background but offers a broad coverage of Java. It includes 159 numbered and numerous inline examples as well as 301 exercises categorized as "conceptual," "programming," and "experiments." The problem-oriented approach presents a problem, explains supporting concepts, outlines necessary syntax, and finally provides its solution. All programs in the book are available for download and experimentation. A substantial index of 5,039 entries makes it easy for readers to locate relevant information. In a fast-changing field, this book is continually updated and refined. The 2013 version is the sixth "draft edition" of this volume, and features numerous revisions based on student feedback.

Editorial Review

About the Author

Barry Wittman is an Assistant Professor of Computer Science at Elizabethtown College. His areas of active research are computer science pedagogy, particularly for parallel computing, and approximation algorithms for graph problems. **Aditya Mathur** is a Professor of Computer Science at Purdue University. He has taught courses in computer science at all levels since 1972. He has written several books, the most well-known being an introduction to microprocessors, the first book of its kind published in India. Aditya has published extensively in international journals and conferences in the area of software engineering.

Users Review

From reader reviews:

Bessie Papp:

Do you have favorite book? In case you have, what is your favorite's book? E-book is very important thing for us to learn everything in the world. Each e-book has different aim or maybe goal; it means that guide has different type. Some people experience enjoy to spend their time and energy to read a book. They are really reading whatever they take because their hobby will be reading a book. Think about the person who don't like studying a book? Sometime, individual feel need book whenever they found difficult problem or even exercise. Well, probably you will want this Start Concurrent: An Introduction to Problem Solving in Java With a Focus on Concurrency, 2014.

Delbert Lambert:

A lot of people always spent their very own free time to vacation or perhaps go to the outside with them family or their friend. Are you aware? Many a lot of people spent that they free time just watching TV, or even playing video games all day long. If you need to try to find a new activity honestly, that is look different you can read a new book. It is really fun for you personally. If you enjoy the book that you just read you can spent all day long to reading a guide. The book Start Concurrent: An Introduction to Problem Solving in Java With a Focus on Concurrency, 2014 it doesn't matter what good to read. There are a lot of those who recommended this book. These were enjoying reading this book. If you did not have enough space bringing this book you can buy typically the e-book. You can m0ore simply to read this book through your smart phone. The price is not too costly but this book has high quality.

William Farley:

This Start Concurrent: An Introduction to Problem Solving in Java With a Focus on Concurrency, 2014 is great e-book for you because the content which can be full of information for you who also always deal with world and also have to make decision every minute. This specific book reveal it information accurately using great plan word or we can point out no rambling sentences inside. So if you are read this hurriedly you can

have whole facts in it. Doesn't mean it only provides straight forward sentences but difficult core information with wonderful delivering sentences. Having Start Concurrent: An Introduction to Problem Solving in Java With a Focus on Concurrency, 2014 in your hand like obtaining the world in your arm, information in it is not ridiculous a single. We can say that no publication that offer you world with ten or fifteen small right but this reserve already do that. So , this is good reading book. Hey Mr. and Mrs. occupied do you still doubt this?

Jerry Lyon:

The book untitled Start Concurrent: An Introduction to Problem Solving in Java With a Focus on Concurrency, 2014 contain a lot of information on it. The writer explains the girl idea with easy way. The language is very straightforward all the people, so do not necessarily worry, you can easy to read that. The book was compiled by famous author. The author provides you in the new period of time of literary works.
