**Aircraft Digital Electronic and Computer Systems** By David Wyatt, Mike Tooley

The Aircraft Engineering Principles and Practice Series provides students, apprentices and practicing aerospace professionals with the definitive resources to advance their aircraft engineering maintenance studies and career.

This book provides an introduction to the principles of aircraft digital and electronic systems. It is written for anyone pursuing a career in aircraft maintenance engineering or a related aerospace engineering discipline, and in particular will be suitable for those studying for licensed aircraft maintenance engineer status as part of an EASA or FAR-147 approved course or taking Aerospace Engineering City & Guilds modules, EDEXCEL National Units, EDEXCEL Higher National Units or a Degree in aircraft engineering.

### **Editorial Review**

#### Review

"as a classroom-type guide to the fundamentals of civil aircraft electronics, it does the job well for aspiring maintenance personnel."

- JOURNAL OF THE ROYAL AERONAUTICAL SOCIETY, December 2008

#### From the Back Cover

(DRAFT) Butterworth-Heinemann's Aircraft Engineering Principles and Practice Series provides students, apprentices and practicing aerospace professionals with the definitive resources to advance your aircraft engineering maintenance studies and career.

Delivers the essential principles and knowledge base required by licensed aircraft engineers following EASA Part-66 qualification routes. The book provides systematic coverage of Module 5 as well as essential underpinning knowledge for Modules 11 and 13 of the EASA Part-66 syllabus. The book is also valuable for those following BTEC awards in aerospace engineering as well as air force personnel and Airframe and Propulsion (A&P) Mechanics in the US.

Comprehensive and accessible, with self-test questions, exercises and multiple choice questions to enhance learning for both independent and tutor-assisted study

Accompanied by on-line resources and an online image bank for use in lecture presentations and in teaching materials.

The Aircraft Engineering Principles and Practice Series provides students, apprentices and practicing aerospace professionals with the definitive resources to advance their aircraft engineering maintenance studies and career.

This book provides an introduction to the principles of communications and navigation systems. It is written for anyone pursuing a career in aircraft maintenance engineering or a related aerospace engineering discipline, and in particular will be suitable for those studying for licensed aircraft maintenance engineer status as part of an EASA or FAR-147 approved course or taking City and Guilds aeronautical engineering courses, EDEXCEL National Units, EDEXCEL Higher National Units or a Degree in aircraft engineering.

#### About the Author

Mike Tooley is a technical author and consultant. He was formerly Vice Principal at Brooklands College in Surrey, England, where he was responsible for the delivery of learning to over 10,000 Further and Higher Education students increasingly by flexible, open and on-line distance learning. Mike is the well-known author of several popular engineering and related text books, including widely adopted course texts for BTEC, GCE A-level and GCSE qualifications in Engineering. Mike's hobbies include astronomy, amateur radio, aviation, computing and electronic circuit design and construction.

### **Users Review**

#### **From reader reviews:**

**Timothy King:**

Book is to be different for every single grade. Book for children until adult are different content. As it is known to us that book is very important for us. The book Aircraft Digital Electronic and Computer Systems was making you to know about other expertise and of course you can take more information. It is extremely advantages for you. The e-book Aircraft Digital Electronic and Computer Systems is not only giving you considerably more new information but also to get your friend when you sense bored. You can spend your own personal spend time to read your guide. Try to make relationship with the book Aircraft Digital Electronic and Computer Systems. You never really feel lose out for everything in the event you read some books.

**John Malcolm:**

This Aircraft Digital Electronic and Computer Systems are generally reliable for you who want to be described as a successful person, why. The key reason why of this Aircraft Digital Electronic and Computer Systems can be one of the great books you must have is giving you more than just simple looking at food but feed an individual with information that maybe will shock your prior knowledge. This book is definitely handy, you can bring it all over the place and whenever your conditions in the e-book and printed versions. Beside that this Aircraft Digital Electronic and Computer Systems forcing you to have an enormous of experience for example rich vocabulary, giving you demo of critical thinking that we realize it useful in your day task. So , let's have it and revel in reading.

**James McDonald:**

This book untitled Aircraft Digital Electronic and Computer Systems to be one of several books which best seller in this year, this is because when you read this reserve you can get a lot of benefit onto it. You will easily to buy this particular book in the book retail store or you can order it through online. The publisher on this book sells the e-book too. It makes you more readily to read this book, because you can read this book in your Mobile phone. So there is no reason to your account to past this e-book from your list.

**Fred Ashman:**

People live in this new morning of lifestyle always aim to and must have the time or they will get lots of stress from both daily life and work. So , whenever we ask do people have extra time, we will say absolutely indeed. People is human not a robot. Then we inquire again, what kind of activity do you possess when the spare time coming to a person of course your answer will probably unlimited right. Then do you try this one, reading textbooks. It can be your alternative in spending your spare time, the actual book you have read is definitely Aircraft Digital Electronic and Computer Systems.
