# Teaching as a Design Science: Building Pedagogical Patterns for Learning and Technology

*By Diana Laurillard*

**Teaching as a Design Science: Building Pedagogical Patterns for Learning and Technology** By Diana Laurillard

Teaching is changing. It is no longer simply about passing on knowledge to the next generation. Teachers in the twenty-first century, in all educational sectors, have to cope with an ever-changing cultural and technological environment. Teaching is now a design science. Like other design professionals – architects, engineers, programmers – teachers have to work out creative and evidence-based ways of improving what they do. Yet teaching is not treated as a design profession.

Every day, teachers design and test new ways of teaching, using learning technology to help their students. Sadly, their discoveries often remain local. By representing and communicating their best ideas as structured pedagogical patterns, teachers could develop this vital professional knowledge collectively.

Teacher professional development has not embedded in the teacher's everyday role the idea that they could discover something worth communicating to other teachers, or build on each others' ideas. Could the culture change?

From this unique perspective on the nature of teaching, Diana Laurillard argues that a twenty-first century education system needs teachers who work collaboratively to design effective and innovative teaching.

## Editorial Review

Review

All the national and international accolades that appear in the book and on the back cover of *Teaching as a Design Science* are justly deserved; this is an innovative endeavor by a visionary author, Diana Laurillard. This text is rich in research studies and the use of digital technologies to enhance learning." **?Teachers College Record**

"The book is written for teachers at all levels, although it will probably be of primary interest to higher education faculty who have the time and resources to explore the ideas presented. It will also be valuable to educational researchers for [Laurillard's] very thorough summary and synthesis of the literature pertaining to teaching, technology, and the design of instruction."?*Educational Technology*

About the Author

**Diana Laurillard** is Professor of Learning with Digital Technologies at the London Knowledge Lab, Institute of Education, leading current research on developing a learning design support environment for teachers, and software for learners with low numeracy. She was previously Head of the e-Learning Strategy Unit at the Department for Education and Skills. She has also served as Pro-Vice-Chancellor for learning technologies and teaching at The Open University, and on the Visiting Committee on IT at Harvard University. She is currently on the Boards of the Observatory for Borderless HE, the UNESCO Institute for Information Technology in Education, the e-Learning Foundation, and the Council for FernUniversität in Hagen.

## Users Review

**From reader reviews:**

**Ashley Williams:**

Here thing why this specific Teaching as a Design Science: Building Pedagogical Patterns for Learning and Technology are different and trusted to be yours. First of all looking at a book is good but it really depends in the content from it which is the content is as tasty as food or not. Teaching as a Design Science: Building Pedagogical Patterns for Learning and Technology giving you information deeper since different ways, you can find any publication out there but there is no publication that similar with Teaching as a Design Science: Building Pedagogical Patterns for Learning and Technology. It gives you thrill reading journey, its open up your current eyes about the thing that happened in the world which is might be can be happened around you. It is easy to bring everywhere like in recreation area, café, or even in your technique home by train. If you are having difficulties in bringing the published book maybe the form of Teaching as a Design Science: Building Pedagogical Patterns for Learning and Technology in e-book can be your alternative.

**Elaine Gold:**

The guide with title Teaching as a Design Science: Building Pedagogical Patterns for Learning and Technology has a lot of information that you can study it. You can get a lot of advantage after read this book. This specific book exist new expertise the information that exist in this publication represented the condition of the world right now. That is important to yo7u to be aware of how the improvement of the world. This book will bring you in new era of the the positive effect. You can read the e-book in your smart phone, so you can read the idea anywhere you want.

**Richelle Johnson:**

Your reading sixth sense will not betray you, why because this Teaching as a Design Science: Building Pedagogical Patterns for Learning and Technology guide written by well-known writer who really knows well how to make book that could be understand by anyone who else read the book. Written within good manner for you, still dripping wet every ideas and publishing skill only for eliminate your current hunger then you still doubt Teaching as a Design Science: Building Pedagogical Patterns for Learning and Technology as good book but not only by the cover but also from the content. This is one e-book that can break don't judge book by its deal with, so do you still needing another sixth sense to pick this specific!? Oh come on your reading sixth sense already told you so why you have to listening to an additional sixth sense.

**Angela Joseph:**

You can obtain this Teaching as a Design Science: Building Pedagogical Patterns for Learning and Technology by browse the bookstore or Mall. Just simply viewing or reviewing it could possibly to be your solve problem if you get difficulties for ones knowledge. Kinds of this book are various. Not only through written or printed but also can you enjoy this book by simply e-book. In the modern era such as now, you just looking by your local mobile phone and searching what their problem. Right now, choose your personal ways to get more information about your e-book. It is most important to arrange yourself to make your knowledge are still change. Let's try to choose right ways for you.
